switch **omni!**

What some of our 14000 Customers say

Anne Pearse - C.Drive - "Omni is easy to install and use and is especially useful for the small business person just starting out with a limited understanding of bookkeeping. **Omni** leads you through all the processes with a minimum of fuss and gets the job done.

A great feature of **Omni** is that it can grow with the business as additional switches can be purchased to cater for changing needs."

Niren Chotoki - Comet Aviation Supplies - "The most stable package I have worked with in many years and I would recommend it to any small to medium business. In 3 years we haven't had the need for any advanced support, the telephonic support is of a very high standard."

Dr. Kate Meiring - Cape Veterinary Equine Practice - "I have used **Omni Accounts** for the past two years as a point of sale system. I have been extremely happy with the software and the service I have received from **Omni Accounts**."

Brenda Koekemoer - Pitsand Vervoer - "I personally can recommend the **Omni** programme to any company, small or large. I have used various programmes for our company in the past, but there was always something about them that did not meet our needs. I have got **Omni** running in two of my companies now and so far I have had no hiccups. It is a very user friendly programme that I am even able to teach to school leavers within a single day, whereas with other programmes my staff had to go on various courses which did not help much. **Omni** also has excellent telephonic back up. Keep up the good work guys."

Wendy Sears - Gold Anvil - "Omni is my first choice for customers who can purchase software that will grow with their business, purchasing switches as they become necessary. It is simple and easy to understand with excellent support staff."

Arendskrantz Restaurant - Andre Vermaak - "Thank you for the excellent service I have received from the outset. Your software is superb and easy to use even for somebody like myself who knows nothing about accounting. I will recommend your product to everybody I come into contact with."

Acorn Carriers - Naresh Theeruth - "Omni Accounts is very user friendly and easy to use. I have had no previous experience with computerised accounting packages and found it easy to install, setup and use."

What some of our Accountants say

Andrew Mulder - Accountant / Consultant - "'OMNI' says it 'ALL' - This is one of the most dynamic easy to use packages that I have ever operated, and it offers feature sets that cater for every type of operation from a one man show to a corporate environment and I will recommend it to all my business associates. But the most amazing factor is the inverse proportion of the low price to the high power delivered by **Omni**."

Grant Hobbs CA (SA). MBA (UCT), Director - Hobaar Farms and Flower Exports (Pty) Ltd, and Director - WhamJam Security (Pty) Ltd www.whamjam.co.za **Director - Revmort (Pty) Ltd** **Director - Seeff International Golf & Leisure Joint Ownership Division (Pty) Ltd.**

"**Omni** has really been a fantastic Accounting program. It has never crashed or frozen on me since I began using it in Dec 2003. It is simple (yet not too simple), robust, easy to navigate, and very flexible. Also great is the way I've been able to bolt-on functionality in a **PAY-AS-YOU-GO** style as my businesses have grown. Telephone and online support is the best you can get. I recommend **Omni** to all my friends and business colleagues."

Osborn Management Services - Rohan Osborn "The **Omni** package is an extremely well defined cost effective and valuable solution for the home user through to the complex environment of a multi-national company. Definitely a product that will save you both time and money! I highly recommend this product."

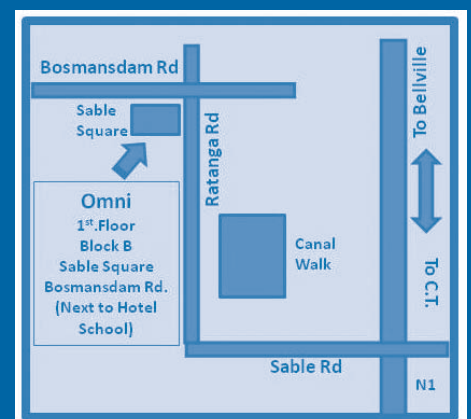

Daniel Gil - "Easy to install, easy to setup and easy to use. That's how I would describe **Omni**."

Johan Bekker - Finatics Accounting Services - "**Omni** empowers you as a businessman, to manage your own business without the costly involvement of a contracting accountant.

Omni, The Accounting Package which costs less, offers more, is more reliable, has better support, allows you to grow your business and will grow with you, to become the entrepreneur you want to be."
